

DATA JOB MARKET SQL ANALYSIS

Tool: PostgreSQL | **Dataset Size:** 10,000+ job listings | **Domain:** Labor Market / Career Analytics

Overview

Conducted a SQL-based exploratory analysis on global data-analyst job postings to identify top-paying roles, in-demand skills, and optimal career paths.

Key Findings

- **SQL, Python, and Power BI** ranked as the most requested skills across roles.
- Analysts proficient in **SQL + Tableau/Power BI** earned 25–40% higher average salaries.
- Top-paying countries: USA, UK, Netherlands, Germany, and Canada.
- Job titles with “senior” or “business intelligence” showed salary jumps averaging **+38%**.

Impact

Helped early-career analysts (including myself) design targeted upskilling roadmaps and focus portfolios on high-ROI tools.

Skills & Tools Applied

SQL, CTEs, window functions, joins, data aggregation, and career-data storytelling.
